

HAPPY PATIENT

THE HEALTH ALLIANCE FOR PRUDENT PRESCRIPTION AND
YIELD OF ANTIBIOTICS FROM A PATIENT-CENTRED PERSPECTIVE

Training healthcare professionals and empowering the patient

The HAPPY PATIENT project was formed as a response from the European Commission to address the increase of antimicrobial resistance.

WHY IS AMR SO IMPORTANT?

Antimicrobial Resistance (AMR) is a phenomenon by which a bacterium becomes resistant to the activity of an antimicrobial drug.

Some studies show that lack of action today may cause about 10 million deaths per year by 2050. AMR is a growing problem threatening societal development and human health.

Infections with antibiotic-resistant bacteria are associated with:

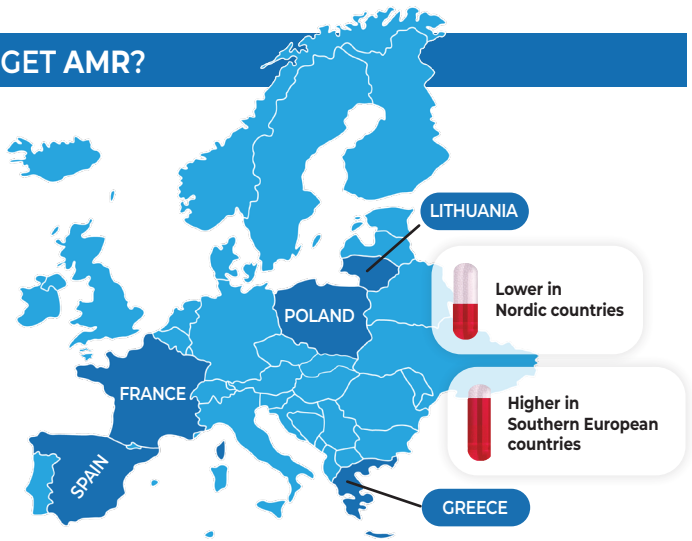

- an increased number of visits to health care providers
- more hospital admissions
- higher mortality
- higher economic expenditure

WHERE DO WE TARGET AMR?

Antibiotic consumption map in Europe

Spain, France, Lithuania, Poland and Greece have been targeted for the **HAPPY PATIENT** project. They have diverse health systems, incomes and level of antimicrobial medicines consumption

HOW CAN YOU FIGHT IT?

Don't take antibiotics if your doctor didn't prescribe them to you

Antibiotics cannot cure every single disease

Be aware that antibiotics are not effective against viral infections

Most common respiratory tract infections, such as the common cold and the flu, are viral and cannot be treated with antibiotics

Most cold and flu symptoms are best treated at home with paracetamol or ibuprofen, plenty of fluids and sleep

WHAT IS HAPPY PATIENT?

HAPPY PATIENT is a European Project that aims to reduce unnecessary antibiotic prescription in Europe.

OUR GOALS

REDUCE
antibiotic consumption
by implementing a
successful strategy

DECREASE
the unnecessary
prescription
of antibiotics
BY 40%

HELP YOU!
to get more involved
in your own health and
participate in your health
decisions

BUILD
a new innovative
patient-centered dynamic

HOW IS HAPPY PATIENT AIMING TO ACHIEVE IN THESE GOALS?

HAPPY PATIENT will implement a patient-centred approach. We will engage Health Care Professionals, who will act as the first points of contact with the healthcare system and will be responsible for the management of community-acquired infections.

The Health Care Professionals to be involved in the HAPPY PATIENT project are:

- Providers of primary health care services i.e. General Practitioners (GPs), nurses, and dentists
- Clinicians in Out-of-Hour (OOH) Services
- Nursing home clinicians
- Pharmacists

The APO method will give to the HCPs the means to think, reflect and improve their actions when facing a certain situation, and this will help reduce the unnecessary prescriptions of antibiotics.

AN INTERNATIONAL CONSORTIUM

15 partners & 2 associated entities.

WHERE DO I FIND HAPPY PATIENT?

www.happypatient.eu

@HAPPY_PATIENT

HAPPY PATIENT

@happy_patient_eu

HappyPatientEU

WHEN WILL THE HAPPY PATIENT TAKE PLACE?

Over 36 months: 2021 - 2023

The reduction in antimicrobial use will lead to a reduction of antimicrobial resistance both in the community and in the individuals.
